

Easyramps ER13.2 specifications

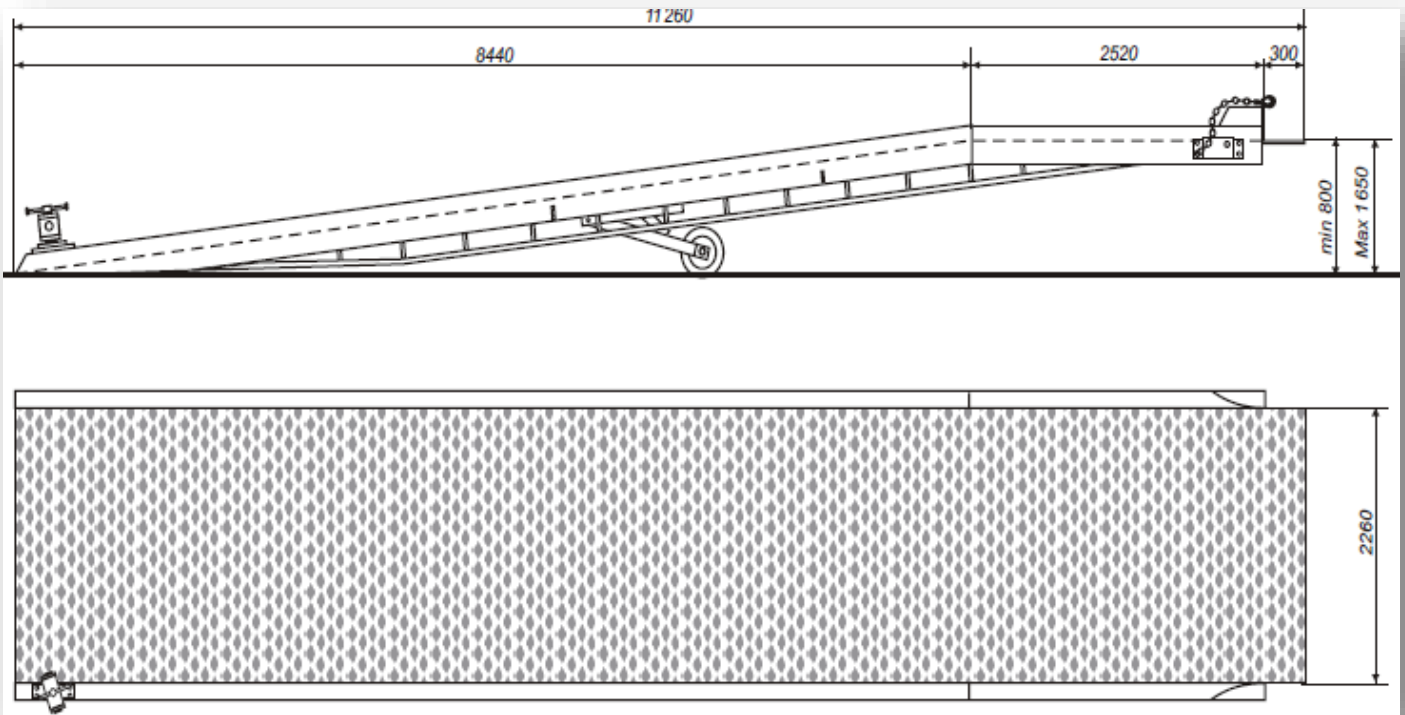

Easyramps is a world-leading specialist and supplier of loading ramps. Our customers include major retailers, logistics providers and waste management companies in the UK, Europe and Worldwide.

We achieve the highest design standards for our loading ramps through computer modelling and a relentless focus on product development over the last 15 years. All our ramps are built to the same heavy duty standard for durability - developed for robustness and ease of use.

Standard specification includes:

- Wheels and fixed swivel clamp for ease of manoeuvrability
- Durable high traction wave type reinforced mesh bed
- Dual action hydraulic Pump & Handle
- Full one-year manufacturer's warranty & user manual
- Complete set of safety chains

Easyramps offer unrivalled technical support and servicing to keep your business working.

We have UK based engineers, and worldwide dealers to assist with every enquiry, with parts in stock to be despatched same day if required.

Servicing can be carried out annually to ensure your ramp stays in a safe and serviceable condition even in the harshest of environments.

MODEL	ER 10.2
Loading Capacity	13 000 kg
Total weight	4 500 kg
Length inclined section	8 440 mm
Length level section	2 520 mm
Overall length	11 260 mm
Overall width	2 500 mm
Usable width	2 260 mm
Variation in working level	800 - 1650 mm
Lip into the container	2260 x 300 mm
